

UCARE (Urology Cancer Research and Education) was founded by a group of clinicians, patients and supporters who care about fighting urological cancer.

We are an independent charity committed to improving the treatment and care of cancer patients through research and education.

Urological cancers represent nearly 20% of all cancers diagnosed in the UK each year. Around 18,000 people die of urological cancers in the UK every year, and may not have been aware of the signs and symptoms that lead to early detection and treatment.

Our vision

Finding new ways to fight cancer.

Our aims

- u To support research into the causes, prevention and treatment of urological cancers and related conditions.
- u To promote the development of new technologies that will help to improve the diagnosis and treatment of urological cancers and related conditions.
- u To provide equipment and facilities for research, and for the treatment of cancer patients.
- u To provide information and education about urological cancers.

Our projects

Our current priority is to support researchers who are working to improve treatments available to people with prostate, kidney, testicular and bladder cancers.

“ The arrival of new equipment funded by UCARE is a huge boost to our research capabilities... it will be a great asset to our work in the treatment of urological cancers. ”

Chris Blick – Clinical Research Fellow, Oxford

“ I owe a personal debt of gratitude to UCARE... in days to come, so might patients benefiting from improved medical treatments. ”

Rob McCormick – Clinical Research Fellow, Oxford

Kidney Cancer

Be aware and informed

Kidney cancer: be aware of the signs and symptoms

Kidney cancer is a one of a number of urological cancers, which can also affect the bladder, prostate, testicles or penis. The kidneys are part of the body's urinary system. They are located either side of the spine in the middle of the back. Kidney cancer is now the eighth most diagnosed cancer in the UK, and affects more men than women.

Urological cancers represent nearly 20% of all cancers diagnosed in the UK each year. Around 18,000 people die of urological cancers in the UK every year, and may not have been aware of the signs and symptoms that lead to early detection and treatment.

Symptoms

The symptoms below can be caused by conditions other than cancer. If you are experiencing any of these symptoms, you should see your GP who may refer you for further investigation. Kidney cancer does not always cause symptoms, but if there are symptoms they can include:

- blood in the urine
- pain
- a swelling or lump in the area of the kidney
- fevers and night sweats
- tiredness
- unexplained weight loss

Diagnosis

Early diagnosis is important: if you have any symptoms or concerns, don't be embarrassed and don't delay – visit your doctor and get checked out.

Treatment

Your doctor will refer you to hospital for further tests. If your tests show that you have kidney cancer, you will be looked after by a specialist multidisciplinary team at the hospital, who can provide the information and support you need:

- Surgeons who are experienced in kidney surgery
- Specialist cancer nurses who give information and support
- Oncologists – doctors who treat kidney cancer using chemotherapy and radiotherapy
- Radiologists who help to analyse scans and x-rays
- Specialist pathologists who analyse the cancer tissue and advise on the type and extent of the cancer

Depending on the stage of your cancer, which means if it has spread or not, the team will decide with you which is the best treatment option. There are three main types of treatment: surgery, chemotherapy and radiotherapy.

After your treatment has finished, you will be asked to go back to the hospital for regular check-ups. At first, these may be every month but they will gradually become less frequent.

I would like to support the fight against cancer

Research is often complicated, time-consuming and expensive but it provides hope for patients and their families, and leads to more effective ways of treating and preventing cancer. **Please help by giving what you can.**

I would like to give a donation to UCARE of:

£10 £100 £250 My choice £

Please make cheques payable to UCARE

I would like to give a monthly donation to help UCARE plan for the future:

£3 £5 £10 £25

My choice £

(Before you send your completed slip to us, please ask your bank or building society to set up your monthly standing order gift and give them our banking details: CAF Bank Ltd, 25 Kings Hill Avenue, Kings Hill, West Malling, Kent ME10 4JQ, Account Number 00017501, Sort Code 40-52-40. To help us keep accurate records, please give your full name as the reference.)
